# Identification and Invitation of NGOs

- External feasibility study for German EITI candidature identified 26 NGOs as potential MSG members
- 30.06.2014: Federal Ministry of Economics and Technology (BMWi) sent an invitation for the 1st round table of the civil society to identified NGOs
- BMWi encouraged them to further disseminate the invitation to potentially interested actors and was open to other interested organizations

## 1st round table of civil society

- 14.07.2014: First get-together of representatives of non-profit-organizations, the BMWi, the German Corporation for International Cooperation (GIZ), and the EITI International Secretariat
- Spokespersons of the NGOs volunteered to selforganize and expand the self-organization in the civil society
- Goals and challenges of a German EITI membership has been phrased by the NGOs
- Plans for forming of MSG and „Transparency Summit“ in autumn 2014 were made

# Transparency Summit

- Took place in Berlin on 26.11.2014
- Marked the launch of preparations for Germany's EITI candidature
- Goal was to inform interested stakeholders and a wide audience about the process and to call on them to engage actively within the scope of the MSG and to gain further participation of NGOs in CSO

# 1<sup>st</sup> constituent meeting of the MSG

- First meeting on 10.03.2015
- CSO and the two other stakeholder groups (government, industry) appointed five representatives (and five alternates) to the MSG each in independent processes
- Civil society members were selected within the scope of an autonomous, open process
- MSG agreed on Terms of Reference of the D-EITI Secretariat and the Rules of Procedure

# Representatives of civil society in multi-stakeholder group

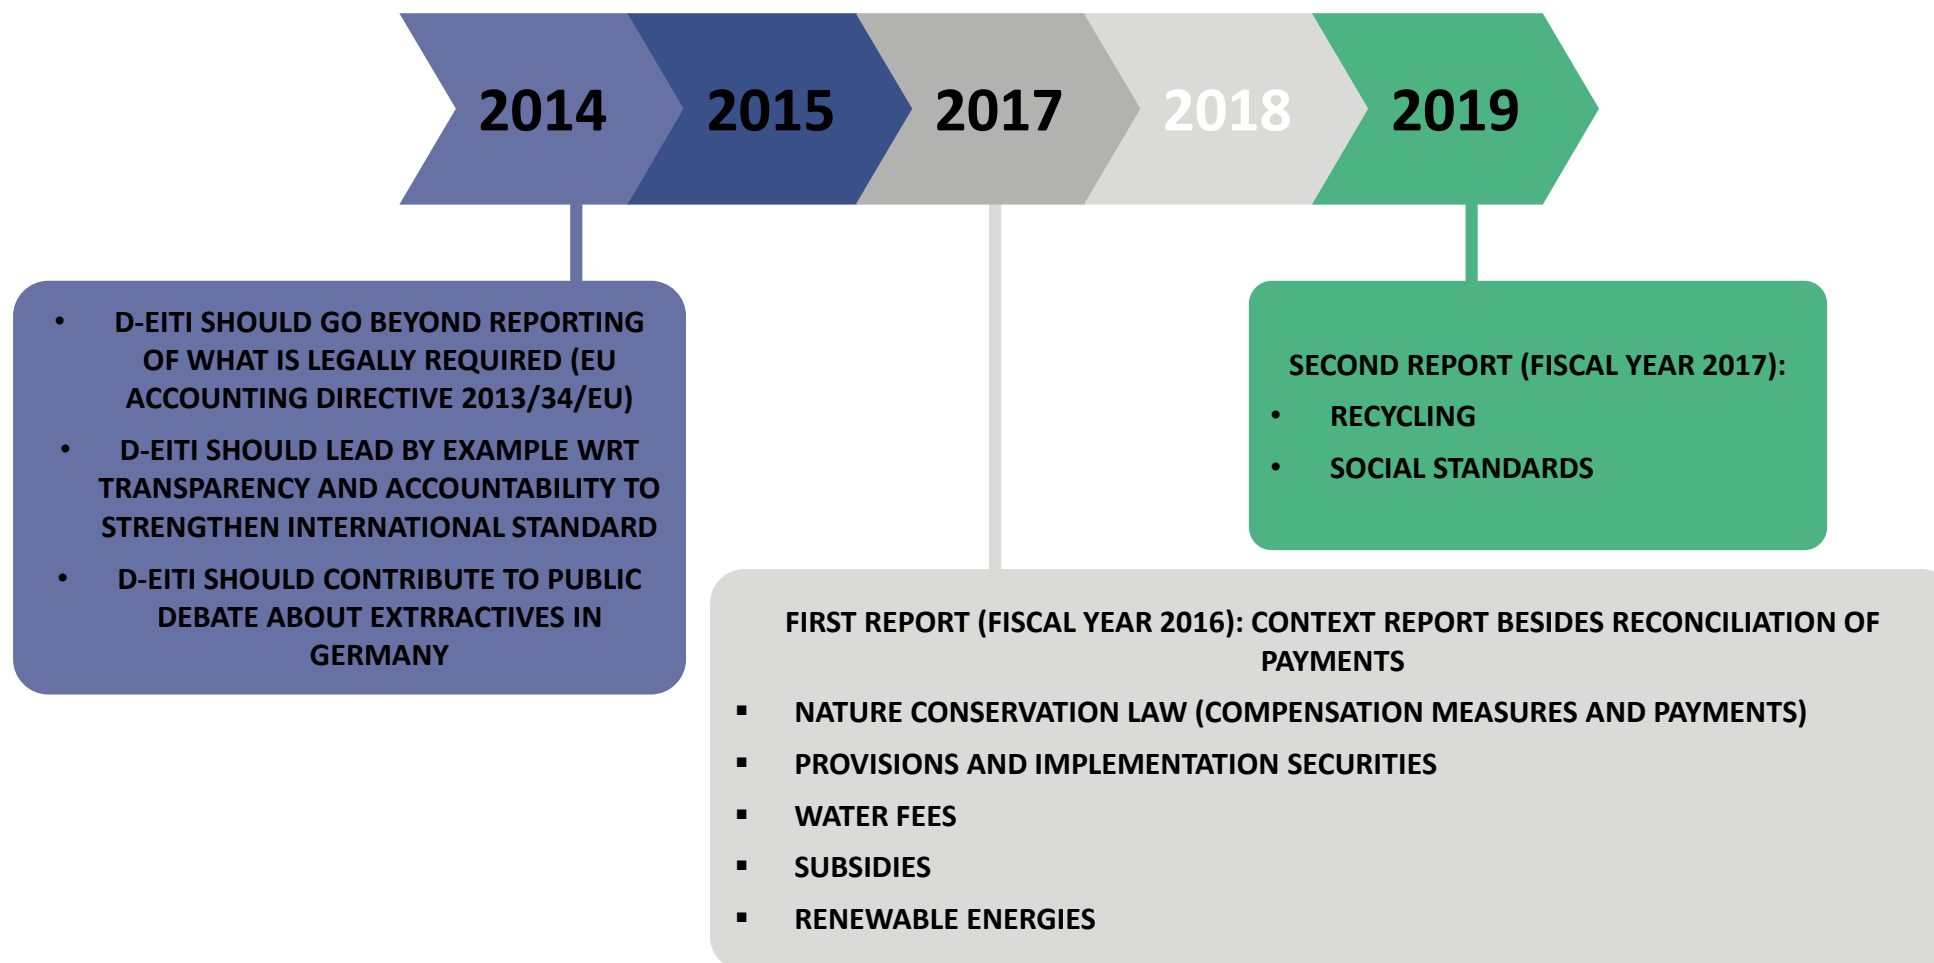

- Four CSOs:
  - Transparency International Deutschland e.V.
  - Forum on Environment & Development, serves as umbrella NGO and represent AK Rohstoffe, a network of German CSOs working on Germany's raw material policy from a development perspective.
  - Open Knowledge Foundation Deutschland e.V.
  - Green Budget Germany (FÖS e.V.)
- Industry representatives
  - Industriegewerkschaft Bergbau, Chemie, Energie (Trade union)

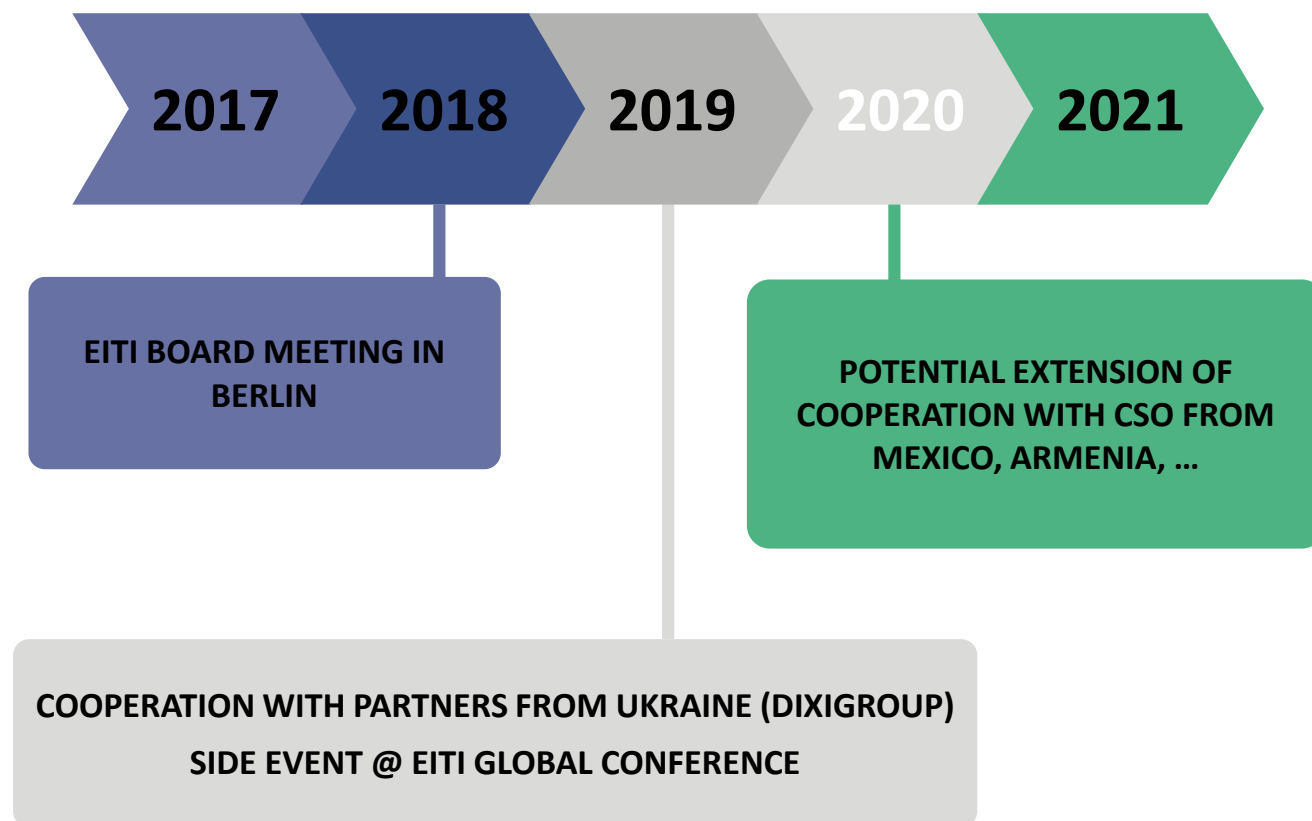

## How we work

- Coordination of MSG CSO members: key contact for national secretariat and the two other stakeholder groups
- Coordination rotates among the four CSOs
- Regular meetings before MSG meetings to discuss agenda items and develop joint positions and fall back positions, allocate statements
- CSO constituency sends representatives to MSG working groups on the basis of expertise/ field of interest of each CSO

## Widening scope: EITI+

## Increasing communication and widening partnership

Many thanks for your  
attention!
