

## BIODIVERSITY-FRIENDLY ECONOMIC GROWTH

# Workshop about the integration of biodiversity into economic reporting

The aim is to contribute to ecosystem services and the integration of biodiversity into economic reporting using practical examples. This will be followed by a presentation of the project's key recommendations for action on integrating biodiversity indices into annual economic reports and beyond. The workshop part will focus on the estimation of participants what should be done to anchor biodiversity more firmly in political action and the economy. The aim is to obtain feedback on specific recommendations for action for the integration of biodiversity into economic reporting.

**1st of Oktober 2025; 9:30am to 3 pm (UTC +2)**
